Research-Based Foundation

The structure of Bouncy's approach to teaching and learning is an evolution of the evidence-based, widely used, *Ripple Effects Whole Spectrum Learning System (WSLS)*. It has been the subject of quantitative evaluations, as well as decades of qualitative review, showing a positive impact on grades, behavior, and resilience assets. Developmentally appropriate adaptation of the *WSLS* draws on insights from the Science of Learning and Development (SoLD) Principles of Practice.

Comprehensive Scope and Sequence

Bouncy's Ready to Learn Resilience is thoughtfully designed to nurture every aspect of a child's development, helping all children succeed. Children learn life and school readiness skills such as managing emotions, belonging, safety, mindsets, empathy, relationship-building, responsibility, and much more. The comprehensive curriculum is well-organized, intentional, and includes everything from clear objectives to enriching content, to assessments and extension activities.

Alignment with Standards

Designed to help kids meet educational and developmental benchmarks, the Bouncy program aligns with the Head Start Early Learning Outcome Framework and other academic standards. Each instructional element and activity is carefully crafted to meet the diverse needs and experiences of learners. Bouncy prioritizes the creation of environments where children feel secure and have positive, supportive relationships integral to optimal learning experiences.

Clear Learning Goals

Bouncy's Ready to Learn Resilience empowers teachers to guide their learners toward success by setting clear, achievable, and measurable learning goals that can be tailored to each child's pace and developmental stage. Recognizing that children learn various concepts and skills simultaneously, the curriculum offers many ways to integrate learning into multiple domains (i.e., math, language and communication, movement, arts, etc.).

Ongoing Assessment & Support

Breathing Bouncy, the multi-sensory animatronic, is dedicated to teaching, modeling, and supporting children's learning progress at every stage and every step of the way. This curriculum seamlessly integrates with systems such as the Multi-Tiered System of Support (MTSS) with the help of resources like the Planning and Progress Monitoring tool, ensuring that every child receives personalized assistance on demand.

Engagement Beyond the Classroom

Bouncy's fun and interactive extension opportunities support families with their child's learning journey. Families are invited to share their knowledge, skills, and cultural backgrounds through play. Program resources include home connection letters; engaging digital resources, like music videos, apps, and games; as well as tips and activities to practice the skills learned at school.

Professional Development

Bouncy's Ready to Learn Resilience supports educators and educational systems with customized onboarding training, user-friendly implementation materials, and guidance to strengthen their social-emotional capacities. The program seeks to empower educators to create nurturing, responsive learning environments that positively impact their learners.

Tailored Learning Experiences

Every child is unique and so is their learning development, and *Breathing Bouncy* is here to help each child SHINE! Our play-based activities and strength-based behavioral interventions can be tailored to match each child's unique interests, strengths, and needs. With practical integration strategies, educators can quickly bring *Breathing Bouncy* to life in their classrooms in ways that will make every child feel special.

Inclusive and Responsive

Bouncy the Service Dog and his squad of Bouncy Buddies (12 children representing a spectrum of strengths, challenges, ethnicities, and abilities) serve as models for teaching and learning. From cultural awareness to language inclusivity (Spanish and English), children see and hear themselves and their experiences in the program's materials.
